

Mats Wikström

Executive summary

Mats is an experienced consultant with a long track record of managing successful projects, covering software development, integration, infrastructure and migration, as well as business development. With a strong technical background, Mats often takes a hands-on role in projects, such as feasibility studies, requirements definition and architectural design as well as software development.

Mats' strengths as project manager are to make accurate estimates of resource requirements, to keep track of many parallel activities and to pinpoint potential risks at an early stage and identify alternative solutions, to be able to deliver on time.

Mats has international experience from working as Sr development manager for Gatespace Inc in CA, coordinating product development with the head quarter in Sweden and managing local customer projects. He has also coordinated edi integration projects involving parties from several countries.

In his spare time, Mats likes to play golf and tennis and go off-piste on his snowboard in wintertime. He has a great interest in interior design and has spent a lot of time renovating homes. He also likes music and attends concerts and festivals whenever possible.

Examples of Mats' assignments:

- Managing OKQ8's integration projects for electronic invoicing.
- Development of Mobile Service Delivery Platform for Ericsson.
- Feasibility study for EDI migration and coordination of integration project for Scanlube.
- Architected and led development of VeloxVictor's Gameshow Platform.
- Managed the development of WebEDI functionality for PipeChain.
- Managed product development and customer integration projects for Emcat.
- Project manager for implementation of customer and supplier EDI for Hilding Anders.
- Technical manager for the development of Service&Repair Contract for Volvo Cars.
- Feasibility study for migration of public web sites for Volvo Cars.
- Responsible for the development of eComOne, an e-procurement solution for Commercior.

1987-1992	Self employed consultant / Studies
1985-1987	ITT Scanips

Mats Wikström

Employment history

PRADIT AB

01/05-

PRADIT is Mats' own company, where he works as consultant in customer assignments and also with own product development. As consultant, Mats focus is on performing feasibility studies and managing integration and software development projects. He is also an excellent software developer and has had assignments developing java/web/mobile solutions. Clients include Ericsson, PipeChain, Scanlube, Vehco and VeloxVictor.

Emcat eBusiness Solutions

04/04-03/05

For Emcat, Mats was responsible for product management of Emcat's WebEDI service and EDI integration projects for customers, as Director of Professional Services. Customers included AtlasCopco, Atlet, Tamro, PartnerTech, Fuji Autotech, Novozymes and more. The WebEDI service offered "increased supply chain visibility", by automating the purchase order to invoice flow, using edi integration and web. The platform was based on technologies as MS sql, asp, iCore, edi, edifact, odette and xml. Significant for Mats' work at Emcat was the ability to manage many ongoing projects and development activities, with few resources.

Gatespace Inc, Palo Alto, CA

02/01-04/02

Gatespace was an early start-up in the service management and telematics industry, providing application development tools and platforms for OSGi based service deployment and management. Mats worked with software development as Sr. Engineer and then assumed the role as Sr. Development Manager, managing the engineering team and customer implementation projects. The work included evaluating partnerships, establishment of development environment and definition of new solutions and service offerings. Technology included linux, win2k, osgi, cablehome, java, xml, x10, upnp, onewire and more.

Mandator Sverige AB

01/94-03/04

At Mandator, Mats worked several years as consultant in technical, Internet and edi related assignments, assuming a number of different roles - developer, architect, analyst, project manager. He was appreciated for high quality and ability to deliver on time and budget. From 1998 he was a member of the management team for region west, responsible for business development in the Internet and e-service sectors. He initiated and managed internal projects to drive the change from traditional consulting to delivering Internet/E-business solutions and established new accounts and projects in this area.

Gothenburg Computing Center

06/92-01/94

After completing the studies at Chalmers, Mats worked as Internet and network consultant for Gothenburg Computing Center, where he implemented and maintained Internet and network services for customers, with a focus on integration issues. He also conducted classes on network usage and Internet services.

ITT Scanips AB, MAWEL System

85-92

For ITT Scanips AB, 6/85-8/87 and MAWEL System, 88-92 (Mats' own firm for minor assignments while studying), Mats worked with software development, network installations and technical support for pc and ibex.

Mats Wikström

Assignments and projects as consultant

HP/OKQ8 **02/10-**
Coordinating EDI integration projects for electronic invoicing, to OKQ8's customers. Establishing processes for efficient setup of several customers per month.
Role: Technical Project leader EDI

VeloxVictor AB **10/07-**
VeloxVictor develops platforms and solutions for interactive game shows for television and other media, through mobile internet.
Role: Managing director, product mgr, developer
Tech: Java, android, midp, comet, hibernate, rmi, ajax

Ericsson **10/09-01/11**
Development of Ericsson's (former Drutt) Mobile Service Delivery Platform MSDP.
Role: Developer
Tech: Java, jboss, spring, gwt, webservices, servlet, etc

Scanlube AB **06/08-01/09**
Specification of integration solution for customer EDI and coordination of the implementation project with Scanlube's customers Preem and YX Energy Dk/No.
Role: Analyst, project coordinator

Scanlube AB **09/07**
Feasibility study to define requirements for a new EDI infrastructure.
Role: Analyst

Vehco AB **03/07**
Analyses and advisory services to optimize the network traffic in a mobile solution for vehicle monitoring, and java software architecture in general.
Role: Analyst

PipeChain AB **10/05-06/08**
Responsible for development of Supplier WebEDI functionality in PipeChain's Supply Chain product.
Role: Project manager, architect, developer
Tech: Java, servlet, jsp, rmi, ms sql, edi, xml, tomcat, eclipse

Emcat eBusiness Solutions **03/05-03/06**
Managed WebEDI implementation projects for Emcat's customers Stadium, Hilding Anders and Dynapac.
Role: Project manager

Volvo Cars Corporation **09/03-03/04**
Led the development of Service&Repair Contract, a system for sales and management of service agreements, integrated to several of VCC's internal systems and external parts.
Role: Technical manager, architect
Tech: J2EE, WebSphere, mq, xml, oracle

Volvo Cars Corporation **10/02-03/03**
Evaluated the consequences of strategic decisions regarding hosting of all VCC's external web sites and applications and migration into Ford's network. Recommended migration strategy and coordinated initial activities.
Role: Analyst, project mgr / coordinator

PostNet **03/00-08/00**
Responsible for the development of a middleware platform for online access from PostNet's web shops to their customers' business systems.
Role: Project owner
Tech: MOpen, intershop, sap/r3

Commercior **09/99-08/00**
Responsible for the development of eComOne, a web based e-procurement solution for the health care industry, integrated to PostNet's EDI service.
Role: Project owner, architect
Tech: Solaris, java, servlet, xml, xsl, oracle, edi

EHPT **05/99-08/99**
Analyses of how to improve the configuration management process using a web based environment. Development of a prototype.
Role: Analyst, developer
Tech: Solaris, java, make, shell script, clearcase

EHPT Training **01/99-03/99**
Analyses of how the web and existing SAP environment can be improved and integrated to support the work processes related to course planning and bookings.
Role: Analyst

Netbook **08/98-11/98**
Advisory services regarding web application architecture and the software development process. Development of a framework in Java for development of the web based hotel booking system Netbook.
Role: Project manager, architect
Tech: Solaris, java, html, oracle oas

EHPT **01/98-04/98**
Development of a fault management server used in telecom equipment.
Role: Developer
Tech: Solaris, c++, java, corba

Mats Wikström

Ericsson Mobile Data Design 11/96-12/97
Specification of performance monitoring of base stations. Design and implementation of a web based Network Management application for switches in GPRS networks. Managed the implementation project.
Role: Project manager, architect, developer
Tech: Solaris, c++, html, cgi, snmp, hp openview

Tekniska verken 10/96-11/96
Specification of a web application for registration and statistics of power consumption, through the Internet.
Role: Architect
Tech: NT, html, javascript, java, intrabuilder

PostNet 08/95-09/96
Development of an X.400 gateway to PostNet's EDI service Infolink, and development of a web application for system administration. Defined requirements, wrote specifications and managed the implementation project.
Role: Project manager, architect, developer
Tech: Solaris, c++, sun x.400 mta, html, cgi, perl, make, rcs, apache

Ericsson Telecom 06/94-07/95
Configuration manager in a distributed project developing a c++ framework for telecom applications. Developed a web based project information system and interface to the development environment.
Role: Configuration manager
Tech: Solaris, c++, html, make, rcs, mm

Several customers 1994-1998
Held seminars and gave advisory services regarding Internet and web technology as information and application interface, and mail usage and technology.
Role: Analyst, teacher

SIK 10/92-12/93
Performed strategic planning services toward integrating and building a company network. Project Manager for system implementation, conducted classes on network usage and Internet services.
Role: Analyst, project manager, teacher

Göteborg University 06/92-12/93
Designed and installed network and information/mail services, conducted classes on network usage and Internet services.
Role: Network architect/developer, teacher

IVT Graphics 05/91-08/91
Development of a purchase order analyses system.
Role: Developer

Several customers 1985-1992
Network installation and Ibx and PC technical support.
